ISO 248-2:2019 (E)

Rubber, raw — Determination of volatile-matter content — Part 2: Thermogravimetric methods using an automatic analyser with an infrared drying unit

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Reagents

6 Apparatus

6.1 Automatic analyser

7 Sampling and preparation of test portion

8 Procedure

8.1 General
8.2 Determination of endpoints for method A and method B
8.3 Method A (pre-defined drying time method)
8.4 Method B (in which drying ends when the mass loss rate has decreased to a pre-defined level)
8.5 Calculation of volatile-matter content

9 Precision

10 Test report

Annex A (informative) Examples of test conditions

A.1 General
A.2 Examples of conditions

Annex B (informative) Precision data

B.1 General
B.2 Details of the ITP
B.3 Precision results
