## Rubber, raw — Determination of volatile-matter content — Part 2: Thermogravimetric methods using an automatic analyser with an infrared drying unit

---

### Contents

|         |  |
|---------|--|
|         | Foreword   |
| 1       | Scope  |
| 2       | Normative references   |
| 3       | Terms and definitions  |
| 4       | Principle  |
| 5       | Reagents   |
| 6       | Apparatus  |
| 6.1     | Automatic analyser   |
| 7       | Sampling and preparation of test portion   |
| 8       | Procedure  |
| 8.1     | General  |
| 8.2     | Determination of endpoints for method A and method B   |
| 8.3     | Method A (pre-defined drying time method)  |
| 8.4     | Method B (in which drying ends when the mass loss rate has decreased to a pre-defined level) |
| 8.5     | Calculation of volatile-matter content   |
| 9       | Precision  |
| 10      | Test report  |
| Annex A | (informative) Examples of test conditions  |
| A.1     | General  |
| A.2     | Examples of conditions   |
| Annex B | (informative) Precision data   |
| B.1     | General  |
| B.2     | Details of the ITP   |
| B.3     | Precision results  |
