DIN EN ISO 12183:2019-12 (E)

Nuclear fue l technology - Controlled-potential coulometric assay of plutonium (ISO 12183:20 16)

Contents

Page

European foreword ... **3**

Foreword ... **4**

1 Scope ... **5**

2 Normative references ... **5**

3 Terms and definitions ... **5**

4 Principle ... **5**

5 Reagents ... **6**

6 Apparatus ... **6**

7 Procedure ... **12**
7.1 Plutonium determination ... 12
7.1.1 Weighing the test sample, with an uncertainty of ±0,01 %, K = 1. ... 12
7.1.2 Preparation of the test sample ... 13
7.1.3 Electrode pre-treatment ... 13
7.1.4 Electrical calibration of the current integration system ... 14
7.1.5 Formal potential determination ... 15
7.1.6 Coulometric blank determination ... 16
7.1.7 Plutonium measurement ... 17
7.2 Analysis of subsequent test samples ... 17

8 Expression of results ... **18**
8.1 Calculation of the electrical calibration factor ... 18
8.2 Calculation of the blank ... 18
8.3 Fraction of electrolysed plutonium ... 19
8.4 Plutonium content ... 20
8.5 Quality control ... 20

9 Characteristics of the method ... **20**
9.1 Repeatability ... 20
9.2 Confidence interval ... 21
9.3 Analysis time ... 21

10 Interferences ... **21**

11 Procedure variations and optimization ... **25**
11.1 Accountability measurements and reference material preparation ... 25
11.2 Process control measurements ... 25
11.3 Measurement cell design ... 25
11.4 Electrolyte and electrode options ... 26
11.5 Test sample size ... 26
11.6 Background current corrections ... 26
11.7 Correction for iron ... 27
11.8 Control-potential adjustment ... 28
11.9 Calibration methodologies ... 28

Annex A (normative) **Purification by anion-exchange separation** ... **29**

Annex B (normative) **Determination of formal potential, E_0** ... **31**

Bibliography ... **32**
