ISO 18218-2:2019 (E)

Leather — Determination of ethoxylated alkylphenols — Part 2: Indirect method

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Apparatus and materials

6 Chemicals

7 Sampling and sample preparation

- 7.1 Preparation of leather samples
- 7.1.1 Sampling and preparation of samples
- 7.1.2 Sample extraction
- 7.2 Preparation of leather process auxiliary samples
- 7.3 Blank determination
- 7.4 Determination of OP and NP
- 7.5 Determination of OPEO and NPEO
- 7.6 Chromatographic analysis
- 7.7 Evaluation

8 Calibration

- 8.1 Calibration for OP and NP
- 8.2 Calibration for OPEO and NPEO

9 Calculation

- 9.1 Calculation of OP and NP
- 9.2 Calculation of OPEO and NPEO

10 Test report

Annex A (normative) Preparation of aluminium triiodide

- A.1 Reagents
- A.2 Apparatus
- A.3 Procedure

Annex B (informative) Example of HPLC chromatograms

- B.1 HPLC conditions

Annex C (informative) Example of GC-MS chromatograms

- C.1 Gas chromatographic conditions
- C.2 MS conditions
