ISO 14309:2019-07 (E)

Rubber, vulcanized or thermoplastic - Determination of volume and/or surface resistivity

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Principle 2

5 Apparatus 2

6 Calibration 6

7 Test pieces 6
7.1 Form 6
7.2 Number of test pieces 7

8 Conditioning 7

9 Test conditions 7
9.1 Temperature and humidity 7
9.2 Applied voltage 7

10 Test procedure 7

11 Expression of results 8
11.1 Volume resistivity 8
11.2 Surface resistivity 8

12 Test report 9

Annex A (informative) Electrode materials 10

Annex B (informative) Suitable range of test conditions 11

Annex C (normative) Calibration schedule 13

Annex D (informative) Effective area of guarded electrode 15
