ISO 23242:2020-02 (E)

Fine ceramics (advanced ceramics, advanced technical ceramics) - Test method for flexural strength of monolithic ceramic thin plates at room temperature by three-point or four-point bending

Contents

Page

Foreword iv

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Principle 3

5 Apparatus 3
5.1 Bend testing machine 3
5.2 Bend test fixture 3
5.2.1 General 3
5.2.2 Bearings 4
5.2.3 Positioning of bearings 4
5.2.4 Fixture material 5
5.3 Calibrated micrometer 5
5.4 Metallurgical microscope 5

6 Test piece dimension and preparation 5
6.1 Shape and dimensions of test piece 5
6.1.1 Machined specimens 5
6.1.2 As-fired specimens 6
6.2 Test piece preparation 6
6.2.1 General 6
6.2.2 As-fired 7
6.2.3 Customary machining procedure 7
6.2.4 Component-matched procedure 7
6.2.5 Handling of specimens 7
6.2.6 Number of test pieces 7

7 Test procedure 7
7.1 Initial dimensions measurement for specimen type identification 7
7.2 Specimen marking 7
7.3 Bend test fixture 8
7.4 Fixture cleaning 8
7.5 Setting test piece in bend fixture 8
7.6 Pre-loading 8
7.7 Protection from fracture fragments 8
7.8 Crosshead speed 8
7.9 Application of test force 9
7.10 Retrieval of broken fragments for successive measurements 9
7.11 Measurement of test piece thickness and width 9
7.12 Fractography 9

8 Calculation 10
8.1 Three-point flexural strength 10
8.2 Four-point flexural strength 11

8.3 Mean and standard deviation 11

9 Test report 11

10 Weibull size scaling 12

Annex A (informative) Chamfer correction factors 13

Bibliography 15
