ISO/TS 22082:2020-05 (E)

Nanotechnologies - Assessment of nanomaterial toxicity using dechorionated zebrafish embryo

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Abbreviated terms ... **2**

5 Materials ... **2**

6 Apparatus ... **3**
6.1 Technical equipment ... 3
6.2 Analytical instruments ... 3

7 Procedures ... **4**
7.1 Culture ... 4
7.1.1 Zebrafish strain ... 4
7.1.2 Feeding regime ... 4
7.1.3 Photoperiod ... 4
7.1.4 Temperature and pH ... 4
7.1.5 Tank material ... 4
7.2 Spawning stimulation ... 4
7.3 Dechorionation of embryos ... 5
7.3.1 Methods ... 5
7.3.2 Enzymatic dechorionation method ... 5
7.4 Preparation of nanomaterials stock solution ... 6
7.5 Testing concentrations ... 6
7.6 Dispersion of nanomaterials ... 6
7.7 Positive chemical: 3,4-dichloroaniline ... 6
7.8 Test methods ... 7
7.8.1 Water quality measurement ... 7
7.8.2 Preparation of dechorionated embryos ... 7
7.8.3 Exposure ... 7
7.8.4 Endpoints observation ... 7
7.9 Data analysis ... 8

8 Test report ... **8**
8.1 Test procedure ... 8
8.2 Information to be included in the report ... 8
8.2.1 Test nanomaterials ... 8
8.2.2 Test species ... 8
8.2.3 Materials and apparatus ... 8
8.2.4 Maintenance ... 9
8.2.5 Test design ... 9
8.2.6 Test conditions ... 9
8.2.7 Results ... 9

Annex A (informative) **Mechanical dechorionation method** ... **10**

Annex B (informative) **Zebrafish embryo spawning procedures** ... **11**

Annex C (informative) **Results validation** ... **12**

Bibliography ... **13**
