DIN 50997:2020-08 (E)

Zinc-aluminium coatings applied by thin film galvanizing of steel - Requirements and testing

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 5

4 General requirements 6
4.1 General 6
4.2 Zinc-aluminium melt 7
4.3 Information to be provided by the purchaser 7
4.4 Safety 7

5 Acceptance test 7

6 Requirements on the coating 7
6.1 Appearance 7
6.2 Coating thicknesses 8
6.2.1 Thickness 8
6.2.2 Test methods 8
6.2.3 Reference areas 8
6.3 Renovation 9
6.4 Adhesion 10
6.5 Acceptance criteria 10

7 Declaration of compliance with the order 10

Annex A (normative) Obligations to provide information on the part of the purchaser and the contractor 11

A.1 Basic information to be provided by the purchaser 11
A.2 Additional information to be provided by the purchaser 11
A.3 Additional information to be provided by the contractor 12
A.4 Agreements between contractor and purchaser 12

Annex B (informative) Influence of design, fabrication and material selection 13

Annex C (informative) Renovation of areas without coating or damaged areas 14

Annex D (informative) Corrosion resistance of zinc-aluminium coatings 15
