ISO 22410:2020 (E)

Corrosion of metals and alloys — Electrochemical measurement of ion transfer resistance to characterize the protective rust layer on weathering steel

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Corrosion resistance by weathering steel

4.1 Formation of rust
4.2 Typical types of rust by cross-sectional view

5 Measurement of ion transfer resistance

5.1 General
5.2 Electrochemical impedance and harmonic current measurements

6 Measurements in the field

7 Evaluation of the corrosion protective property of the rust layer

8 Practical method of measurement for ion transfer resistance and thickness

9 Test report

10 Application of the method of measurement

Annex A (informative) Example of a frequency range suitable for measuring the ion transfer resistance
