ISO 22910:2020 (E)

Corrosion of metals and alloys — Measurement of the electrochemical critical localized corrosion temperature (E-CLCT) for Ti alloys fabricated via the additive manufacturing method

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Main contents and limitations of existing standards

- 4.1 Application coverage of ISO 17864
- 4.2 Limitations of ISO 17864
- 4.3 Scope of ISO 18089
- 4.4 Limitations of ISO 18089

5 Principle

6 Apparatus

7 Test solutions

8 Test specimens

9 Procedure

- 9.1 Preparation of reference electrodes
- 9.2 Preparation of Ti alloy specimen
- 9.3 Preparation of solution
- 9.4 Setting up the E-CLCT test
- 9.5 Ending test

10 Evaluation of test results

11 Test report

Annex A (informative) Relationship between applied potential and localized corrosion of AM Ti-alloys with temperature
