ISO 17234-1:2020 (E)

Annex B (informative) Reliability of the method

Leather — Chemical tests for the determination of certain azo colourants in dyed leathers — Part 1: Determination of certain aromatic amines derived from azo colourants

	A.1 A.2 A.2. A.3 A.4 A.5	2	Preliminary remark High-performance liquid chromatography (HPLC) High-performance liquid chromatography/diode array detector (HPLC-DAD) High-performance liquid chromatography/mass selective detector (HPLC-MS) Capillary gas chromatography (GC-MS) Capillary electrophoresis (CE-DAD) Thin-layer chromatography (TLC); HPTLC or TLC only for semiquantitative confirmation General	
	A.5. A.5.		Derivatization procedure	

Annex C	(informative) Assessment guide — Interpretation of analytical results2 2 From ISO 14362-1:2017, Annex C.
C.1	General
C.1.	1 General
C.1.	2 Determination of 4-aminoazobenzene
C.1.	3 False-positive results
C.1.	4 In the case of levels per amine component ≤ 30 mg/kg
C.1.	5 In the case of levels per amine component > 30 mg/kg
C.2	Guidance on procedure and explanations if false-positive results are possible
C.2.	1 False-positive results from chromatographic problems
C.2.	1.1 False-positive results from isomers
C.2.	1.2 False-positive results from sources other than azo colourants
C.2.	1.2.1 False-positive results from high temperature in GC-injector
C.2.	1.2.2 False-positive results generated from chemical procedure
C.2.	1.2.3 False-positive results from colourants
Annex D	(informative) Procedure for liquid/liquid extraction without diatomaceous earth
D.1	Preliminary remark
D.2	
D.3	
D.4	Procedure
D.4.	1 Preparing sample
D.4.	2 Degreasing
D.4.	3 Reductive cleavage
D.4.	
D.4.	
D.4.	6 Check procedure
