ISO/TR 23437:2020 (E)

Solid biofuels — Bridging behaviour of bulk biofuels

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Part I: Proposed method for direct determination of bridging behaviour

- 4.1 Introduction to the method
- 4.2 Principle
- 4.3 Test equipment
- 4.4 Sampling and sample preparation
- 4.5 Procedure
- 4.6 Calculation
- 4.7 Precision and bias
- 4.8 Test reporting

5 Part II: Implementing the measuring principle

- 5.1 Review of apparatus construction
- 5.2 Other equipment
- 5.3 Measurement performance

6 Part III: Experience and results from bridging tests

- 6.1 General
- 6.2 Performance characteristics of bridging test method
- 6.2.1 General
- 6.2.2 Sensitivity analysis on testing accuracy
- 6.2.3 Reproducibility (interlaboratory test results)
- 6.2.4 Repeatability
- 6.3 Characterization of selected biomass fuels
- 6.4 Influencing factors on bridging
- 6.5 Outlook
