DIN 25481:2020-12 (E)

Requirements for process cells for the handling of radioactive materials

Contents

Page

Foreword ... 4

Introduction ... 5

1 Scope ... 6

2 Normative references ... 6

3 Terms and definitions ... 7

4 Design and requirements of process cells ... 8
4.1 General ... 8
4.2 Cell category ... 8
4.3 Dimensions of a process cell ... 9
4.4 Process cell systems ... 9
4.5 Installation requirements ... 9

5 Shielding ... 10
5.1 General requirements ... 10
5.2 Typical shielding materials ... 10
5.3 Wall openings ... 11
5.4 Entry port ... 11

6 Tightness requirements ... 11

7 Basic equipment of the process cell ... 12
7.1 General ... 12
7.2 Process cell ... 12
7.3 Entry ports and posting systems ... 13
7.4 Handling tongs and manipulators ... 13
7.5 Glove ports ... 13
7.6 Optics ... 13
7.7 Media ports ... 14
7.8 Ventilation and filtration ... 14
7.8.1 General ... 14
7.8.2 Negative pressure ... 14
7.8.3 Air exchange ... 15
7.8.4 Air flow ... 15
7.8.5 Air filtration ... 15
7.9 Radiation protection measurement technology ... 16
7.10 Cladding or coating ... 16
7.11 Lighting ... 16
7.12 Electrical installation ... 16
7.13 Mains backup or emergency power supply ... 17
7.14 Fire protection ... 17
7.15 Marking ... 17

8 Additional equipment ... 17
8.1 Transport facilities ... 17
8.2 Facilities for residual materials ... 17
8.3 Storage of radioactive materials ... 17

9 Maintenance and service ... 18

Annex A (informative) **Examples of equipment for cell categories** **19**
Bibliography **21**
