DIN EN 10371:2021-06 (E)

Metallic materials - Small punch test method

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Symbols and designations 9

5 Test piece 12
5.1 General 12
5.2 Material sampling 14

6 Apparatus 14
6.1 Testing machine 14
6.2 Test environment 15
6.3 Applying and measuring force 15
6.4 Punch and specimen holder 15
6.5 Measuring displacement and/or deflection 17
6.6 Measuring test temperature 17

7 Small punch test 18
7.1 Principle 18
7.2 Test procedure 18
7.3 Characteristic parameters on the force-deflection curve F(u) 19
7.4 Test report 23

8 Small punch creep test 23
8.1 Principle 23
8.2 Specificities of apparatus for small punch creep testing 24
8.3 Test procedure 24
8.4 Characteristics of the deflection-time curve 25
8.5 Test report 26

Annex A(informative) Determining the compliance of a small punch test rig for displacement measurements 27

Annex B(informative) Procedure for temperature control and measurement during small punch testing 30

Annex C(informative) Estimation of ultimate tensile strength Rm from small punch testing 35

Annex D(informative) Estimation of proof strength Rp0,2 from small punch testing 39

Annex E(informative) Estimation of DBTT from small punch testing 40

Annex F (informative) Estimation of fracture toughness from small punch testing 43

Annex G(informative) Estimation of creep properties from small punch creep testing 46

Annex H(informative) Post-test examination of the test piece 50

Annex I(informative) Machine readable formats 56
