## Textiles — Determination of fabric propensity to surface pilling, fuzzing or matting — Part 3: Random tumble pilling method

---

### Contents

|         |   |
|---------|---|
|         | Foreword  |
|         | Introduction  |
| 1       | Scope   |
| 2       | Normative references  |
| 3       | Terms and definitions                                       |
| 4       | Principle   |
| 5       | Apparatus and auxiliary materials                           |
| 5.1     | Apparatus   |
| 5.2     | Auxiliary materials   |
| 6       | Preparation of test specimens                               |
| 6.1     | Pretreatment of the laboratory sample                       |
| 6.2     | Sampling of test specimens                                  |
| 6.3     | Fixation of test specimen edges                             |
| 6.4     | Number of test specimens and marking                        |
| 7       | Preparation of polychloroprene liners                       |
| 8       | Conditioning and testing atmosphere                         |
| 9       | Procedure   |
| 10      | Assessment of pilling, fuzzing and matting                  |
| 11      | Results   |
| 12      | Test report   |
| Annex A | (normative) Checking of apparatus and preparation of liners |
| A.1     | Checking of apparatus                                       |
| A.2     | Preparation of liners                                       |
| A.2.1   | Cleaning and drying of polychloroprene liners               |
| A.2.2   | Running-in of new polychloroprene liners                    |
| Annex B | (informative) Alternative procedure                         |
| B.1     | Principle   |
| B.2     | Number of test specimens and marking                        |
| B.3     | Alternative procedure                                       |
| Annex C | (informative) Rationale                                     |
