ISO 24267:2020 (E)

Footwear — Determination of coefficient of friction for footwear and sole components — Test method

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Apparatus and materials

6 Sampling and conditioning

6.1 Sampling
6.2 Conditioning

7 Preparation of sample and floor

8 Test method

8.1 Test modes and test conditions for footwear with low heel seat height
8.2 Test modes and test conditions for unit soles
8.3 Footwear or soles with heel and forepart moulded in one piece with full contact with the floor in the waist area
8.3.1 Samples with heel seat height lower than 80 mm
8.3.2 Samples with heel seat height higher than 80 mm
8.4 Footwear or soles with heel and forepart moulded in one piece without full contact with the floor in the waist area
8.5 Test on top pieces
8.6 Test on sheet materials
