## ISO 7195:2020 (E)

## Nuclear energy — Packagings for the transport of uranium hexafluoride (UF6)

## Contents

	Fore	word
	Intro	duction
1	Scop	е
2	Norm	native references
3	Term	s and definitions
4		ngement system
5		ral requirements for cylinders and valve protection
	5.1 5.2	Design of cylinders and valve protection
		Fabrication of new cylinders
	5.2.1	General
	5.2.2	Radiography and other non-destructive examinations (NDEs)
	5.2.3	Testing
	5.2.4	Cylinder marking
	5.2.5	Reports, certification, and records
	5.2.6 5.2.7	Outer surface Cleanliness
	5.2. <i>1</i> 5.2.8	
	5.2.6 5.3	Standard cylinders In-service cylinders and valve protection
	5.3 5.3.1	Cleanliness
	5.3.2	Testing
	5.3.3	Routine inspections
	5.3.4	Periodic inspections and tests
	5.3.4.1	One-year periodic inspection and tests on 30C cylinders
	5.3.4.2	Five-year periodic inspection and tests for all cylinders
	5.3.4.2.1	General
	5.3.4.2.2	
	5.3.4.2.3	Alternative five-year periodic inspection and tests
	5.3.4.2.4	Removal of cylinders from service
	5.3.5	Cylinder maintenance/repair/alteration
	5.3.6	Maintenance of valves specified in 8.2 and 8.3
6	Spec	ific requirements for cylinders and valve protection
	6.1	1S Cylinder
	6.1.1	Design conditions
	6.1.2	Materials
	6.1.3	Fabrication
	6.1.4	Radiography
	6.1.5	Valve
	6.1.6	Plug
	6.1.7	Valve installation
	6.1.8	Testing
	6.1.9	Cylinder marking
	6.1.10	Cleaning
	6.1.11	Certification
	6.1.12	External surface treatment
	6.2	2S Cylinder
	6.2.1	Design conditions
	6.2.2	Materials
	623	Fabrication
