Natural gas - Determination of composition with defined uncertainty by gas chromatography - Part 1: Guidelines for tailore d analysis

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Symbols and subscripts 4

5 Principles of analysis 4

6 Materials 5

7 Apparatus 5

8 Required characteristics 6

9 Sampling 6

10 Analytical procedure 6

11 Methods of test 8

12 Control chart 10

13 Uncertainty in the mole fraction of the normalized components 10

14 Test report 10

Annex A (informative) Comparative characteristics of typical analytical methods, as described in parts Annex B (informative) Use of control charts 13
