## Pipeline corrosion control engineering life cycle — General requirements

---

### Contents

	Foreword
1	Scope
2	Normative references
3	Terms and definitions
4	General principles
5	Objectives
6	Corrosion sources
7	Pipeline materials
8	Technology
9	Design
10	Research and development
11	Manufacturing
12	Construction and installation
13	Handling, storage and transportation
14	Commissioning
15	Acceptance inspection
16	Operation
17	Maintenance
18	Repair
19	Decommissioning, abandonment and disposal
20	Documents and records
21	Resource management
22	Comprehensive assessment
