ISO 12004-2:2021-02 (E)

Metallic materials - Determination of forming-limit curves for sheet and strip - Part 2: Determination of forming-limit curves in the laboratory

Contents

Page

Foreword ... **iv**

Introduction ... **vi**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Symbols ... **1**

5 Principle ... **2**

6 Test pieces and equipment ... **3**

6.1 Test pieces ... 3

6.1.1 Thickness of test pieces ... 3

6.1.2 Test piece geometry ... 3

6.1.3 Test piece preparation in test area ... 4

6.1.4 Number of different test piece geometries ... 4

6.1.5 Number of tests for each geometry ... 4

6.2 Application of grid ... 4

6.2.1 Type of grid ... 4

6.2.2 Grid application ... 5

6.2.3 Accuracy of the undeformed grid ... 5

6.3 Test equipment ... 5

6.3.1 General ... 5

6.3.2 Strain determination ... 7

6.3.3 Nakajima test ... 7

6.3.4 Marciniak test ... 9

7 Analysis of strain profile and measurement of ε_1 – ε_2 pairs ... **11**

7.1 General ... 11

7.2 Evaluation using section lines (position-dependent measurement) ... 11

7.2.1 General ... 11

7.2.2 Position and processing of measurements ... 12

7.2.3 Extraction of the “bell-shaped curve” and determination of the inner limits for the best-fit curve through experimental points ... 13

7.2.4 Definition of outer limits for best-fit windows and evaluation of the inverse best-fit parabola on the “bell-shaped curve” ... 14

8 Documentation ... **15**

9 Test report ... **16**

Annex A (normative) **Second derivative and “filtered” second derivative** ... **17**

Annex B (normative) **Calculation of the width of the fit window** ... **18**

Annex C (normative) **Evaluation of the inverse best-fit parabola on the “bell-shaped curve”** ... **19**

Annex D (normative) **Application/Measurement of grid — Evaluation with magnifying glass or microscope** ... **21**

Annex E (informative) **Tables of experimental data for validation of calculation programme** ... **22**

Annex F (normative) **Representation and mathematical description of FLC** ... **23**

Annex G (informative) **Examples of critical section line data** ... **24**

Annex H (normative) **Flowchart from measured strain distributions to FLC values** ... **25**

Bibliography ... **27**
