ISO 21645:2021 (E)

Solid recovered fuels — Methods for sampling

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Symbols

5 Principle

6 Development of a sampling plan

- 6.1 Principle
- 6.2 Definition of overall objectives
- 6.3 Definition of a lot and determining lot size
- 6.3.1 General
- 6.3.2 Definition of a lot in case of sampling from a material flow
- 6.3.3 Definition of a lot in case of transport by a vehicle
- 6.3.4 Definition of a lot in case of transport by ship
- 6.3.5 Definition of a lot in case of sampling from a static lot
- 6.4 Determination of the sampling procedure
- 6.5 Determination of the number of increments
- 6.6 Determination of minimum sample mass
- 6.7 Determination of the minimum increment mass
- 6.7.1 Determination of minimum increment mass for material flows
- 6.7.2 Determination of the minimum increment mass for static lots, vehicles or ships
- 6.8 Determination of the planned increment and planned sample amounts
- 6.9 Selection of distribution of increments over a lot
- 6.9.1 General
- 6.9.2 Determination of the distribution of the increments when sampling from a material flow
- 6.9.3 Determination of the distribution of the increments when sampling from a vehicle(s)
- 6.9.4 Implementation of sampling from a static lot
- 6.10 Sampling equipment and implements

7 Implementation of the sampling plan

- 7.1 Steps before actual sampling
- 7.2 Steps during sampling
- 7.3 Steps after sampling

8 Handling and storage of samples

9 Precision

Annex A (normative) Procedure for the development of a sampling plan

- A.1 General
- A.2 Principle
- A.3 Procedure

Annex B (normative) Sampling plan

- B.1 General
- B.2 Form for the sampling plan

Annex C (informative) Example of a sampling plan

C.1 General
C.2 Example of completed sampling plan

Annex D (normative) Sampling equipment and implements

D.1 General
D.2 Principle
D.3 Selection of an apparatus
D.4 Examples for sampling from a moving conveyor or drop flow
D.5 Sampling frame
D.6 Sampling scoop
D.7 Shovels
D.8 Mechanical probe

Annex E (normative) Determination of minimum sample mass

E.1 General
E.2 Principle
E.3 Determination of parameters necessary for the minimum sample mass
E.3.1 General
E.3.2 Determination of the nominal top size
E.3.3 Determination of the shape factor
E.3.4 Determination of the particle density and bulk density
E.3.5 The distribution factor g
E.3.6 The factor p
E.3.7 The coefficient of variation cv
E.4 Calculation of the minimum sample mass
E.4.1 General
E.4.2 Quick determination of minimum sample mass for fluff-type solid recovered fuels
E.4.3 Quick determination of minimum sample mass for granular solid recovered fuels

Annex F (normative) Determination of increment mass for sampling from material flows

F.1 General
F.2 Principle
F.3 Determination of increment mass for mechanical sampling from a drop flow
F.4 Determination of increment mass for manual sampling from a drop flow
F.5 Determination of increment mass for sampling from a conveyor

Annex G (normative) Determination of increment mass for sampling from static lots, vehicles or ships

G.1 General
G.2 Principle
G.3 Procedure

Annex H (normative) Implementation of sampling plan from a material flow

H.1 General
H.2 Principle
H.3 Procedure verification of sampling aspects
H.4 Procedure: Mechanical or manual sampling from the drop flow
H.5 Procedure: Mechanical sampling from a moving conveyor
H.6 Procedure: Manual sampling from a stationary conveyor

Annex I (normative) Implementation of the sampling plan from a static lot or vehicle

I.1 General
I.2 Principle
I.3 Procedure
I.4 Implementation of sampling in locations chosen in a stratified random way

Annex J (normative) Minimum sample mass required for analysis

J.1 General
J.2 Principle
J.3 Procedure

Annex K (informative) Additional information about precision

K.1 General

K.2 Scope
K.3 Trueness
K.4 Repeatability and reproducibility
K.5 Robustness
K.5.1 General
K.5.2 Type of solid recovered fuel
K.5.3 Increment mass and sample mass
K.5.4 Lot size
K.5.5 Number of increments

Annex L (informative) Examples for stratified and stratified random sampling

L.1 General
L.2 Stratified sampling
L.3 Stratified random sampling
