## Refractory products - Determination of compressive strength at elevated temperature

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Principle .....	1
5	Apparatus .....	2
5.1	Furnace .....	2
5.2	Loading device .....	2
5.2.1	General .....	2
5.2.2	Loading column .....	2
5.2.3	Supporting column .....	2
5.2.4	Discs .....	2
5.3	Deformation measuring device .....	2
5.4	Calipers .....	3
5.5	Electrical oven .....	3
5.6	Set square .....	3
5.7	Feeler gauge .....	3
6	Test pieces .....	3
6.1	Sampling .....	3
6.2	Dimensions .....	3
6.3	Preparation .....	3
6.3.1	Shaped refractory products .....	3
6.3.2	Dense unshaped refractory products .....	3
6.4	Dimension checking .....	4
6.4.1	Plane of loading surfaces .....	4
6.4.2	Parallelism of loading surfaces .....	4
6.4.3	Perpendicularity .....	4
6.5	Drying and treatments .....	4
7	Procedures .....	4
7.1	Dimension measurement .....	4
7.1.1	Diameter .....	4
7.1.2	Height .....	4
7.2	Installation .....	5
7.3	Heating .....	5
7.3.1	Test temperature .....	5
7.3.2	Heating rate .....	6
7.3.3	Dwell time .....	6
7.4	Loading .....	6
7.4.1	Dense refractory products .....	6
7.4.2	Insulating refractory products .....	6
8	Calculation of results .....	6
9	Precision and bias .....	6

9.1	Interlaboratory data .....	6
9.2	Precision .....	7
9.3	Bias .....	7
10	Test report .....	7
