

DIN 51220:2022-10 (E)

Materials testing machines - General requirements, calibration and verification of materials testing machines

Contents		Page
Foreword		3
1	Scope	4
2	Normative references	4
3	Terms and definitions	6
4	General requirements on materials testing machines	6
4.1	Testing requirements	6
4.2	Requirements on force measuring systems	6
4.3	Requirements on extensometers	6
4.4	Requirements on stationary hardness testing machines	7
4.5	Requirements on mobile hardness testing machines	7
4.6	Requirements on torque measuring systems	7
4.7	Requirements on notch bar impact testing devices and drop weight impact testing devices	7
5	Safety requirements	7
6	Verification and calibration of materials testing machines	7
6.1	General	7
6.2	Scope of verification and calibration	7
6.3	Frequency of verification and calibration	8
6.4	Calibration certificate	8
Annex A (informative)	Overview of the national standards and supplements containing specifications on the requirements for and on the verification and calibration of materials testing machines	9
Bibliography		12
Tables	Table A.1 -- Overview of relevant standards	9
