# ISO 4215:2022-09 (E)

## Corrosion of metals and alloys - Test method for high-temperature corrosion testing of metallic materials by thermogravimetry under isothermal or cyclic conditions

## Contents

Page

Foreword ..... iv

Introduction ..... v

1 Scope ..... 1

2 Normative references ..... 1

3 Termsanddefinitions ..... 1

4 Test method ..... 2
4.1 Principle ..... 2
4.2 Test pieces ..... 3

5 Test apparatus ..... 5
5.1 Thermobalance ..... 5
5.2 Furnace ..... 6
5.3 Temperature probe ..... 6
5.4 Data acquisition device ..... 7
5.5 Test piece holder ..... 7
5.6 Reactive gas and gas flow ..... 7
5.7 Protection of the thermobalance ..... 7

6 Calibration ..... 8
6.1 Mass calibration ..... 8
6.2 Thermocouple calibration ..... 8

7 Procedure ..... 8
7.1 General ..... 8
7.2 Isothermal test ..... 8
7.3 Cyclic test ..... 9

8 Expression of results -- Graphical presentation ..... 9

9 Analysis of the mass change ..... 9
9.1 General ..... 9
9.2 Isothermal exposure ..... 9
9.3 Thermal cycling exposure ..... 10

10 Test report ..... 11
10.1 Test report contents ..... 11

Bibliography ..... 13
