## Surface chemical analysis - Analysis of metallic nanolayers on iron based substrates by glow-discharge optical-emission spectrometry

---

| <b>Contents</b> |   | <b>Page</b> |
|-----------------|---|-------------|
|                 | Foreword.....   | v           |
| <b>1</b>        | <b>Scope</b> .....  | <b>1</b>    |
| <b>2</b>        | <b>Normative references</b> .....   | <b>1</b>    |
| <b>3</b>        | <b>Terms and definitions</b> .....  | <b>1</b>    |
| <b>4</b>        | <b>Principle</b> .....  | <b>1</b>    |
| <b>5</b>        | <b>Apparatus</b> .....  | <b>2</b>    |
| 5.1             | Glow discharge optical emission spectrometer.....                         | 2           |
| 5.1.1           | General.....  | 2           |
| 5.1.2           | Selection of spectral lines.....  | 2           |
| 5.1.3           | Selection of glow discharge source type.....                              | 2           |
| <b>6</b>        | <b>Adjusting the glow discharge spectrometer system settings</b> .....    | <b>3</b>    |
| 6.1             | General.....  | 3           |
| 6.2             | Setting the parameters of a DC source.....                                | 4           |
| 6.2.1           | Constant applied current and voltage.....                                 | 4           |
| 6.2.2           | Constant applied current and pressure.....                                | 5           |
| 6.2.3           | Constant voltage and pressure.....  | 5           |
| 6.3             | Setting the discharge parameters of an RF source.....                     | 6           |
| 6.3.1           | General.....  | 6           |
| 6.3.2           | Constant applied power and pressure.....                                  | 6           |
| 6.3.3           | Constant applied power and DC bias voltage.....                           | 6           |
| 6.3.4           | Constant effective power and effective RF voltage.....                    | 7           |
| 6.4             | Minimum performance requirements.....                                     | 7           |
| 6.4.1           | General.....  | 7           |
| 6.4.2           | Control of lamp cleanliness and start-up performance.....                 | 7           |
| 6.4.3           | Minimum repeatability.....  | 9           |
| 6.4.4           | Detection limit.....  | 9           |
| <b>7</b>        | <b>Sampling</b> .....   | <b>11</b>   |
| <b>8</b>        | <b>Calibration</b> .....  | <b>11</b>   |
| 8.1             | General.....  | 11          |
| 8.2             | Calibration samples.....  | 11          |
| 8.2.1           | General.....  | 11          |
| 8.2.2           | Low alloy iron or steel samples.....                                      | 12          |
| 8.2.3           | Stainless steel samples.....  | 12          |
| 8.2.4           | Nickel alloy samples.....   | 12          |
| 8.2.5           | Titanium alloy samples.....   | 12          |
| 8.2.6           | Aluminium alloy samples.....  | 12          |
| 8.2.7           | High oxygen samples.....  | 12          |
| 8.2.8           | High carbon samples.....  | 12          |
| 8.2.9           | High purity copper sample.....  | 12          |
| 8.3             | Validation samples.....   | 13          |
| 8.4             | Determination of the sputtering rate of calibration samples.....          | 13          |
| 8.5             | Emission intensity measurements of calibration samples.....               | 14          |
| 8.6             | Calculation of calibration equations.....                                 | 14          |
| 8.7             | Validation using reference materials.....                                 | 14          |
| 8.7.1           | General.....  | 14          |
| 8.7.2           | Checking analytical accuracy using bulk reference materials.....          | 15          |
| 8.7.3           | Checking analytical accuracy using surface layer reference materials..... | 15          |

|                              |   |           |
|------------------------------|---|-----------|
| 8.8                          | Verification and drift correction .....   | 15        |
| <b>9</b>                     | <b>Analysis of test specimens</b> .....   | <b>16</b> |
| 9.1                          | Adjusting discharge parameters .....  | 16        |
| 9.2                          | Setting of measuring time and data acquisition rate.....  | 16        |
| 9.3                          | Quantifying depth profiles of test specimens.....   | 16        |
| <b>10</b>                    | <b>Expression of results</b> .....  | <b>17</b> |
| 10.1                         | Expression of quantitative depth profile .....  | 17        |
| 10.2                         | Determination of total coating mass per unit area (coating areic mass) .....                    | 17        |
| <b>11</b>                    | <b>Precision</b> .....  | <b>17</b> |
| <b>12</b>                    | <b>Test report</b> .....  | <b>18</b> |
| <b>Annex A</b> (normative)   | <b>Calculation of calibration constants and quantitative evaluation of depth profiles</b> ..... | <b>19</b> |
| <b>Annex B</b> (informative) | <b>Suggestions concerning suitable spectral lines</b> .....                                     | <b>31</b> |
| <b>Annex C</b> (informative) | <b>Additional information on international cooperative tests</b> .....                          | <b>32</b> |
| <b>Bibliography</b>          | .....   | <b>35</b> |
