Corrosion of metals and alloys - Method of oxalic acid etching test for intergranular corrosion of austenitic stainless steel

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	General principles	2
5	Apparatus	2
6	Sensitization heat treatment for test specimens	2
7	Test specimens	2
8	Test solution	2
9	Test procedure	3
10	Evaluation of etching structure	4
11	Test report	4
Bibliography		6
