Coal - Guidance for sampling in coal preparation plants

Contents		Page
Foreword		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	General principles and considerations	2
4.1	General	2
4.2	Principles of sampling	3
4.3	Objectives of sampling in coal preparation plants	3
4.3.1	General	3
4.3.2	Determination of scope of sampling using a sampling decision tree	4
5	Design considerations	6
5.1	Principles	6
5.1.1	Solids sampling	6
5.1.2	Slurry sampling	6
5.2	Systems for new plants and retrofitting	7
5.2.1	New plant mechanical sampling systems	7
5.2.2	New plant manual sample points	8
5.2.3	Existing plant with no mechanical system	8
5.2.4	Manual sampling points in existing plants	8
6	Planning for sampling	9
6.1	Pre-sampling inspection	9
6.2	Personnel	9
6.3	Containers	9
6.4	Method	10
6.4.1	Overview	10
6.4.2	Sampling Time	10
6.4.3	Sampling for feed quality characterization	10
6.4.4	Sampling for quality monitoring and control	11
6.4.5	Sampling for equipment performance	12
6.4.6	Sample mass	13
7	Sampling management	21
7.1	Consideration of process	21
7.2	Handling of samples after collection	21
8	Sampling from a slurry stream	21
8.1	Slurry flow regimes	21
8.2	Sampling locations	22
8.3	Slurry sampling methods	23
8.3.1	Considerations for sampling of slurry streams	23
8.3.2	Manual sampling	25
8.3.3	Automatic slurry samplers	30
8.4	Secondary sampling of slurry streams	38
9	Considerations for screen discharge sampling	39

10	Sampling of magnetite received in bulk	41
11	Sampling report	41
	Annex A (informative) Recommended manual sampling locations and options	42
	Annex B (informative) Checklist examples	48
	Annex C (informative) Recommended laboratory analysis	54
	Annex D (informative) Example of sampling plan	59
	Bibliography	63
