## Testing of cellular materials - Determination of the resistance to liquids, vapours, gases and solid materials

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	6
4	Principle .....	7
5	Designation .....	7
5.1	Symbols denoting ageing media .....	7
5.2	Designation .....	7
6	Apparatus .....	7
7	Test agents and equipment .....	8
7.1	General .....	8
7.2	Liquids .....	8
7.3	Gases and vapours .....	8
7.4	Solids .....	8
8	Preparation and shape of test specimens .....	9
8.1	Specimens for the determination of mass and changes in dimensions .....	9
8.2	Test specimens for the determination of changes in other properties .....	9
9	Number of test specimens .....	9
10	Conditioning of test specimens .....	9
11	Ageing procedure and determination of changes to the test specimens caused by test agents .....	9
11.1	Temperature .....	9
11.2	Duration of ageing .....	10
11.3	Recording of the atmospheric pressure .....	10
11.4	Examination of test specimens before ageing in the test medium (to obtain E1 values) ....	10
11.4.1	Determination of mass and dimensions .....	10
11.4.2	Determination of other properties .....	10
11.5	Examination of specimens during and at the end of ageing (to obtain E2 values) .....	10
11.5.1	Ageing in liquids .....	10
11.5.2	Exposure in gases and vapours .....	11
11.5.3	Ageing in solids .....	11
11.6	Removal of test specimens from test media .....	11
11.7	Examination of reconditioned test specimens with test medium removed (to obtain E3 values) .....	12
11.8	Examination of ageing medium (for extractable constituents of the test specimen according to 11.7 to obtain E4 values) .....	12
12	Evaluation .....	12

12.1	Symbols .....	12
12.2	Determination of absolute and relative changes in mass (in volume) and in dimensions ..	14
12.2.1	Test specimen mass .....	14
12.2.2	Test specimen volume .....	14
12.2.3	Test specimen dimensions .....	15
12.2.4	Other physical properties .....	15
12.3	Determination of the absorption of test agent by the test specimen (to be determined with specimen immersed) .....	15
12.4	Determination of changes in other properties of reconditioned specimens (E3) .....	15
12.5	Determination of changes in other properties of test specimens which give off constituents to the test liquid .....	16
13	Test report .....	16
	Bibliography .....	17
	Tables Table 1 -- Examples of suitable rinsing liquids .....	12
