Overview of methods available for particle-free erosion corrosion testing in flowing liquids

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Principles 1
4.1 Particle-free erosion corrosion 1
4.2 Particle-free erosion corrosion test 1
4.3 Material loss and observation of surface damage 2

5 Test methods 2
5.1 Tests for uniform corrosion 2
5.1.1 Rotating cylinder test 2
5.1.2 Test in a pipe or channel 3
5.2 Tests for nonuniform corrosion 3
5.2.1 Rotating disc test 3
5.2.2 Test in a pipe or channel with changes in flow cross section 4
5.2.3 Jet impingement test 5
5.3 Application method of electrochemical measurement 6

6 Test condition 9
6.1 General 9
6.1.1 Selection of test method 9
6.1.2 The effect of flow velocity and test duration in the respective tests 9
6.1.3 Wall shear stress 10
6.1.4 Selection of damage measuring methods 11
6.1.5 Insulation of test specimen 11
6.1.6 Use of multiple specimens 11
6.1.7 Unit of metal loss 11
6.2 Applications and limitations of tests 11
