Fine bubble technology - Agricultural applications - Part 4: Test method for evaluating the number concentration of ultrafine bubbles (UFB) achieving the promotion of barley seed germination

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Requirements for UFB water used	1
5	Basic characteristics of UFB water relevant to promotion of barley seed germination[1]	2
6	Assessment of the adequacy of UFB number concentration[1]	3
6.1	General	3
6.2	Case 1: UFB1 water results in greater promotion effect than UFB2 water	3
6.3	Case 2: UFB1 and UFB2 waters result in similar promotion effect	5
6.4	Case 3: UFB1 water results in suppression of germination comparing to UFB2 water	7
7	Test report	9
Annex A (informative) Example of measured data of UFB's promotion effect on another variety of barley seed (Ichibanboshi) than that of `Yumesakiboshi'		10
Annex B (informative) Attributes (storage duration and storage temperature) of seeds that can affect the degree of seed germination		11
