

ISO 32543-1:2024-05 (E)

Non-destructive testing - Characteristics of focal spots in industrial X-ray systems - Part 1: Pinhole camera radiographic method

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Test equipment	2
4.1	Essential characteristics of the pinhole	2
4.2	Alignment and position of the pinhole camera	3
4.3	Position of the radiographic image detector	4
4.4	Requirements on the radiographic image detector	5
4.5	Image processing equipment for digital images	5
4.6	Loading factors	6
5	Measurement and determination of the focal spot size	6
5.1	Measurement procedure	6
5.2	Measurement with digital technique (preferred method)	7
5.3	Evaluation with digital technique using integrated line profiles (ILP)	8
5.4	Measurement of effective focal spot size visually using film radiographs	10
6	Classification and result of focal spot size measurement	11
Annex A (normative) Values for the classification of X-ray tube focal spot sizes		13
