ISO 7383-2:2024-07 (E)

Fine bubble technology - Evaluation method for determining gas content in fine bubble dispersions in water - Part 2: Hydrogen content

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Principle and application **2**
4.1 General 2
4.2 Titration (oxidimetry) method 2
4.3 Gas chromatography 2

5 Apparatus and materials **2**
5.1 Titration (oxidimetry) method 2
5.1.1 Reagent 2
5.1.2 Dropper or titrator 3
5.1.3 Clear vial 3
5.2 Gas chromatography 3
5.2.1 Vial and clamping machine 3
5.2.2 UFBs elimination 3
5.2.3 Carrier gases and column 3
5.2.4 Gas chromatograph 3
5.2.5 Measurement device for UFB size and concentration 4

6 Procedure **4**
6.1 Titration (oxidimetry) method 4
6.2 Gas chromatography 4
6.2.1 General 4
6.2.2 Sample sealing 5
6.2.3 UFBs elimination 6
6.2.4 Analysis of gas substitutes 6

7 Results and calculation **8**
7.1 Titration (oxidimetry) method 8
7.2 Gas chromatography 8
7.2.1 General 8
7.2.2 Calibration curve for hydrogen concentration measurement 8
7.2.3 Volume of the water sample in the vial 9
7.2.4 Volume of the headspace above the UFB dispersion in the vial 9
7.2.5 Pressure of the gas in the vial headspace 10
7.2.6 Hydrogen content in the vial head space 10
7.2.7 Hydrogen content in the vial water sample 10
7.2.8 Hydrogen content in association with each number concentration of UFBs and dissolved hydrogen 11

8 Error of measurement **12**
8.1 Titration (oxidimetry) method 12
8.2 Gas chromatography 12
8.3 Relative standard deviation of the gas chromatograph 13

9 Test report **13**
9.1 Testing results 13
9.2 Testing conditions 13

Annex A (informative) **Example of test result at testing laboratory by titration (oxidimetry) method** **14**

Annex B (informative) **Example of test result at testing laboratory by gas chromatography using the capillary column** **17**

Annex C (informative) **Example of test result at testing laboratory by gas chromatography using the packed column** **20**

Annex D (informative) **Comparison of different vials when testing the hydrogen content by gas chromatography** **23**

Bibliography **25**
