DIN EN ISO 19337:2024-11 (E)

Nanotechnologies - Characteristics of working suspensions of nano-objects for in vitro assays to evaluate inherent nano-object toxicity (ISO 19337:2023)

Contents

Page

European foreword ... **3**

Foreword ... **4**

Introduction ... **5**

1 Scope ... **6**

2 Normative references ... **6**

3 Terms and definitions ... **6**

4 Abbreviated terms ... **7**

5 Characteristics and measurement methods ... **7**

5.1 General ... 7

5.2 Stability of working suspensions ... 8

5.2.1 General ... 8

5.2.2 Representative size change of secondary particles of nano-objects ... 8

5.2.3 Concentration change of nano-objects ... 8

5.3 Concentration of metal ions ... 8

5.4 Concentration of culture medium components ... 9

5.4.1 General ... 9

5.4.2 Proteins ... 9

5.4.3 Calcium ... 9

5.5 Contamination ... 9

6 Reporting ... **10**

6.1 General ... 10

6.2 Name of nano-objects and manufacturing information ... 10

6.3 Composition and metallic elements included in the nano-object sample ... 10

6.4 Culture medium and serum ... 10

6.5 Measurement results ... 10

6.6 Optional methods ... 11

Annex A (normative) **Flow of measurements** ... **12**

Annex B (informative) **Measurement and evaluation of stability** ... **13**

Annex C (informative) **Measurement of metal ions** ... **14**

Annex D (informative) **Measurement of culture medium components** ... **16**

Annex E (informative) **Contamination** ... **17**

Bibliography ... **18**
