

ISO 1856:2000-11 (E)

Flexible cellular polymeric materials - Determination of compression set

Contents		Page
1	Scope	1
2	Normative reference	1
3	Term and definition	1
4	Principle	1
5	Apparatus	2
6	Test pieces	2
6.1	Requirements	2
6.2	Samples showing orientation	2
6.3	Number of test pieces	2
6.4	Conditioning	2
7	Procedure	2
7.1	General	2
7.2	Method A (compression at 70 °C)	3
7.3	Method B (compression at standard conditioning temperature)	3
7.4	Method C (compression under specifically specified conditions)	3
8	Calculation and expression of results	3
9	Precision	3
10	Test report	4
