DIN 50938:2025-06 (E)

Black oxide coatings on ferrous metal components - Requirements and test methods

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Designation 5
4.1 General 5
4.2 Coating methods 5
4.3 Heat treatment 6
4.4 Supplementary treatments 6

5 Ordering details 7

6 Procedure 7
6.1 Preparation of surfaces 7
6.2 Main treatment 7

7 Testing the black oxide coating not subject to post-treatment 8
7.1 General 8
7.2 Testing the appearance 8
7.3 Testing the degree of protection by exposure to a condensation atmosphere with constant humidity 8
7.4 Testing the degree of protection with acetic acid at ambient temperature 9
7.4.1 Test solution 9
7.4.2 Procedure 9
7.5 Testing the degree of protection with oxalic acid at ambient temperature 9
7.5.1 Test solution 9
7.5.2 Procedure 9
7.6 Determination of the mass per unit area 10
7.6.1 Test solution 10
7.6.2 Procedure 10

8 Test report 11

Bibliography 12

Tables Table 1 -- Mass per unit area of black oxide coating 6

Table 2 -- Designation of supplementary treatments applied to black oxide coatings 6

Table 3 -- Minimum duration of the DIN EN ISO 6270-2-CH test 8

Table 4 -- Minimum duration of the acetic acid test 9

Table 5 -- Assessment of the oxalic acid test 9
