ISO 8943:2025-04 (E)

Refrigerated light hydrocarbon fluids - Sampling of liquefied natural gas - Continuous and intermittent methods

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Outline of sampling system 3
4.1 General 3
4.2 Direct sampling 4
4.3 Indirect sampling 4
4.3.1 General 4
4.3.2 Spot sampling 5
4.3.3 Incremental composite sampling 5
4.4 Multiple LNG transfer lines 5

5 Precautions 10
5.1 Precautions in handling LNG 10
5.2 Partial fractionation of the LNG sample 11
5.3 Supervision during sampling 11

6 Apparatus 11
6.1 Materials used 11
6.2 Sampling probe 11
6.3 LNG sample vaporizer 12
6.4 Compressor for transferring gasified LNG 12
6.5 Pressure regulator 12
6.6 Gas sample holder 12
6.7 Gas sample compressor 13
6.8 Gas sample cylinder or CP/FP sample cylinder 13
6.9 Piping arrangement 14
6.10 Sample filter 14

7 Sampling procedure 15
7.1 General 15
7.2 Sampling of LNG 15
7.3 Suspension of sampling 15
7.4 Continuous sampling 15
7.4.1 Filling the gas sample holder with gasified LNG 15
7.4.2 Filling the gas sample cylinder 16
7.5 Intermittent sampling 16
7.5.1 Filling the CP/FP sample cylinder with gasified LNG 16
7.5.2 Purging the CP/FP sample cylinder 16
7.6 Online gas chromatograph 16

8 Sampling report 17

Annex A (informative) Example of calculation of degree of sub-cooling 18

Annex B (informative) Constant pressure (CP)/floating piston (FP) sample cylinder with technical specifications 21

Annex C (informative) Example of sampling report 24

Bibliography 25
