## Properties of fluids in electric drives - Copper corrosion behaviour of lubricating oils and cooling fluids for use in electric drives

---

| Contents                                            | Page |
|-----------------------------------------------------|------|
| Foreword .....                                      | 3    |
| 1 Scope .....                                       | 4    |
| 2 Normative references .....                        | 4    |
| 3 Terms and definitions .....                       | 4    |
| 4 Principle .....                                   | 4    |
| 5 Apparatus .....                                   | 5    |
| 6 Reagents and aids .....                           | 6    |
| 7 Procedure .....                                   | 6    |
| 7.1 Preparation of copper strips -- Sanding .....   | 6    |
| 7.2 Preparation of copper strips -- Polishing ..... | 6    |
| 7.3 Test procedure .....                            | 7    |
| 8 Evaluation .....                                  | 8    |
| 8.1 Step 1 .....                                    | 8    |
| 8.2 Step 2 .....                                    | 8    |
| 9 Expression of results .....                       | 9    |
| 10 Precision .....                                  | 9    |
| 11 Test report .....                                | 10   |
| Bibliography .....                                  | 11   |
| Figures                                             |      |
| Figure 1 -- Open test set-up .....                  | 7    |
