| Foreword .....        |   | iv          |
| Introduction .....    |   | v           |
| 1                     | Scope .....   | 1           |
| 2                     | Normative references .....  | 1           |
| 3                     | Terms and definitions .....   | 1           |
| 4                     | Reagents and materials .....  | 2           |
| 5                     | Apparatus .....   | 2           |
| 6                     | Preparation and preservation of test samples and test specimens ..... | 3           |
| 7                     | Procedure .....   | 4           |
| 7.1                   | General .....   | 4           |
| 7.2                   | Method A -- Single analysis procedure .....                           | 4           |
| 7.2.1                 | Preparation of injection vials .....                                  | 4           |
| 7.2.2                 | Placement of test specimen .....                                      | 4           |
| 7.2.3                 | Placement of injection vials .....                                    | 4           |
| 7.2.4                 | Conditioning the test specimens .....                                 | 4           |
| 7.2.5                 | Preparation of the odour component chemical solution .....            | 4           |
| 7.2.6                 | Injection of testing odour component chemical solution .....          | 5           |
| 7.2.7                 | Sampling of the testing gas .....                                     | 5           |
| 7.2.8                 | Concentration measurement of testing gas by GC .....                  | 5           |
| 7.2.9                 | Peak area of MS/FID spectrum of testing gas with test specimen .....  | 5           |
| 7.2.10                | Concentration of testing gas without specimen .....                   | 5           |
| 7.3                   | Method B -- Auto-regeneration procedure .....                         | 5           |
| 7.3.1                 | Analysis .....  | 5           |
| 7.3.2                 | Repeat cycles .....   | 5           |
| 8                     | Calculation of odour reduction rate .....                             | 6           |
| 9                     | Test report .....   | 6           |
| Annex A (informative) | GC parameters .....   | 7           |
| Annex B (informative) | Selection of the test condition comparing to ISO 17299-3 .....        | 9           |
| Annex C (informative) | Example of test result .....  | 10          |
| Annex D (informative) | Example of odour reduction rate test report .....                     | 13          |
| Bibliography .....    |   | 14          |
