ISO 4650:2026-07 (E)

Rubber - Identification - Infrared spectrometric methods

Contents

Page

Foreword iv

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Principle 1
4.1 General 1
4.2 Analysis by transmission 1
4.3 Analysis by reflectance 2

5 Types of rubber 2
5.1 General 2
5.2 M group 2
5.3 O group 2
5.4 Q group 2
5.5 R group 2
5.6 T group 3
5.7 U group 3
5.8 TPE group 3
5.9 Exceptions for blends 3
5.10 Reference spectra 4

6 Reagents 4

7 Apparatus 4

8 Procedure for infrared spectrometric examination using the transmission technique 6
8.1 Procedure for raw rubber films moulded or cast from solution 6
8.2 Procedure for raw rubbers, vulcanizates and films obtained from pyrolysate 6
8.2.1 General 6
8.2.2 Preferred method: Temperature-controlled pyrolysis in a stream of nitrogen 6
8.2.3 Alternative method: Gas flame pyrolysis 7
8.3 Procedure for vulcanized rubber film obtained after evaporation of the solution solvent 7
8.3.1 General 7
8.3.2 Dissolution of vulcanizate 7
8.3.3 Mild thermal degradation of vulcanizates 7

9 Procedure for attenuated total reflectance (ATR) or micro-ATR surface analysis 8

10 Interpretation of spectra 8
10.1 Reference spectra 8
10.2 Tables of diagnostic absorptions 8

11 Test report 9

Annex A (informative) Comparison of reflectance and transmission spectra 10

Annex B (informative) Absorption characteristics and reference spectra 11

Bibliography 79
