DIN EN 1779:2026-12 (E)

Non-destructive testing - Leak testing - Criteria for method and technique selection

Contents

Page

European foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Personnel qualification 4

5 Units 4

6 Tightness requirements 4

7 Leak testing methods and techniques 5
7.1 General 5
7.2 Techniques for leak location and techniques for measurement 6
7.3 Time dependence (in tracer gas techniques) 14
7.4 Influence of flow conditions 14
7.4.1 General 14
7.4.2 Influence of pressure 15
7.4.3 Influence of temperature 16
7.4.4 Nature of gas 17
7.5 Influence of other factors 17

8 General principles of method and technique selection 17
8.1 General 17
8.2 Range of leakage rates 18
8.3 Test type: measure or localize 18
8.4 Test object design 18
8.5 Operation and testing conditions 19
8.6 Safety and environmental factors 19
8.6.1 Hazard due to a pressure difference 19
8.6.2 Hazardous materials 19
8.6.3 Electrical hazards 20

Annex A (normative) Specific features of leak testing methods 21

Annex B (informative) Conversion factors for leakage rate units 32
