Hard coal and coke - Mechanical sampling - Part 5: Coke; Sampling from moving streams

Contents		Page
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Establishing a sampling scheme	1
5	Methods of sampling	8
6	Design of mechanical samplers	11
7	Handling and storage of samples	19
8	Sample preparation	20
9	Minimization of bias	20
10	Verification	21
Annexes A	Examples of calculations of the number of sub-lots and number of increments per sub-lot for moving streams of coke	22
B	Evaluation of sampling equipment for mass-basis sampling	24
C	Guidance on the operation of mechanical samplers	28
	Bibliography	29
