Fine ceramics (advanced ceramics, advanced technical ceramics) - Determination of thermal diffusivity of monolithic ceramics by laser flash method

Contents	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Apparatus	3
4.1 Specimen holder	4
4.2 Pulse laser	4
4.3 Thermometer for measuring steady-state temperature of the specimen	5
4.4 Detector for measuring transient temperature rise of rear face of the specimen	5
4.5 Environment for measurements	5
4.6 Temperature control unit	5
4.7 Data acquisition unit	5
5 Specimen	5
5.1 Shape and dimension of specimens	5
5.2 Coating on the specimen	6
5.3 Reference specimen	6
6 Measurement procedure	6
6.1 Measurement of specimen thickness	6
6.2 Surface treatment	6
6.3 Determination of flash time of the laser pulse and the chronological profile of the laser pulse	6
6.4 Temperature and atmosphere control	6
6.5 Stability of specimen temperature	6
6.6 Energy of pulse heating	7
6.7 Measurement temperature	7
6.8 Record	7
7 Data analysis	7
7.1 Calculation based on the half-rise-time method	7
7.2 Criteria for applicability of the half-rise-time method	7
8 Measurement report	10
Annex A (informative) Principle of laser flash thermal diffusivity measurements	12
Annex B (informative) Correction for non-ideal initial and boundary conditions	13
Annex C (informative) Data analysis algorithms to calculate thermal diffusivity from observed temperature history curve under non-ideal initial and boundary conditions	19
Annex D (informative) Other error factors	22
Annex E (informative) Reference data and reference materials of thermal diffusivity	28
Bibliography	29
