DIN EN 14970:2006-04 (E)

Textiles - Knitted fabrics - Determination of stitch length and yarn linear density in weft knitted fabrics

Contents

Page

page Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Apparatus 6

5 Conditioning and testing atmosphere 6

6 Method A: Stitch length 6

7 Method B: Linear density 8

8 Test report 8

Annex A (informative) Example of exploitation of the test method "barré analysis" 9

Annex B (informative) Example of measurement on typical knitted fabrics 11

Annex C (informative) Statistical evaluation of the precision 12
