DIN EN 1071-4:2006-05 (E)

Advanced technical ceramics - Methods of test for ceramic coatings - Part 4: Determination of chem ical composition by electron probe microanalysis (EPMA)

Contents

Page

Foreword 3

1 Scope 5

2 Normative references 5

3 Terms and definitions 5
3.1 General 5
3.2 Terms used in electron probe microanalysis 6

4 Principle 7

5 Apparatus and materials 8
5.1 General 8
5.2 Scanning electron microscope 8
5.3 Electron probe microanalyser 9
5.4 Energy dispersive spectrometer 9
5.5 Wavelength dispersive spectrometer 9

6 Preparation of test piece 9
6.1 General 9
6.2 Surface roughness 9
6.3 Surface conduction 10

7 Test procedure 11
7.1 General 11
7.2 Instrument conditions 11
7.3 Analysis of thin coatings 11
7.4 Analysis of thick coatings 12
7.5 Analysis of multilayer coatings 12

8 Accuracy and interferences 13

9 Test report 13
