## Surface chemical analysis - Analysis of zinc- and/or aluminium-based metallic coatings by glow-discharge optical-emission spectrometry

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
1	Scope .....	1
2	Normative references .....	1
3	Principle .....	1
4	Apparatus .....	2
4.1	Glow discharge optical emission spectrometer .....	2
4.2	Minimum performance requirements .....	2
5	Sampling .....	4
6	Procedure .....	4
6.1	Selection of spectral lines .....	4
6.2	Optimizing the glow discharge spectrometer system settings .....	5
6.3	Calibration .....	8
6.4	Validation of the calibration .....	11
6.5	Verification and drift correction .....	12
6.6	Analysis of test samples .....	13
7	Expression of results .....	13
7.1	Quantitative depth profile .....	13
7.2	Determination of total coating mass per unit area .....	13
7.3	Determination of average mass fractions .....	14
8	Precision .....	14
9	Test report .....	15
Annex A (normative)	Calculation of calibration constants and quantitative evaluation of depth profiles .....	16
Annex B (informative)	Suggested spectral lines for determination of given elements .....	24
Annex C (informative)	Determination of coating mass per unit area .....	25
Annex D (informative)	Additional information on interlaboratory tests .....	29
Bibliography .....		32
