Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Principle 3

5 Reagents and materials 3
5.1 Water characteristics 4
5.2 Preparation of synthetic test waters using mother solutions 4

6 Apparatus 5
6.1 Temperature measurement 5
6.2 Circulation-rate monitor 5
6.3 Make-up, evaporation and blow-down measurement 5
6.4 Cooling tower 5

7 Test method 6
7.1 Procedure 6
7.1.1 Cleaning of the test assembly 6
7.1.2 Test tube preparation and pre-treatment 6
7.1.3 System water content 6
7.1.4 Procedure to fill the cooling water system 6
7.1.5 Heating the test tubes 7
7.1.6 Flow rate 7
7.1.7 Blow-down and half-life 8
7.1.8 Biocide treatment 8
7.1.9 Make-up water for cooling-tower use 8
7.2 Determination of analytical and control parameters 8
7.3 Test data reporting 9
7.4 Test termination 9

8 Assessment of results 9
8.1 Recording of cooling water quality 9
8.2 Treatment of the test tubes 9
8.3 Assessment of results on deposition and fouling 9
8.4 Assessment of results on corrosion 10

9 Test report 11

Annex A (informative) Test data sheet on the performance of cooling water treatment programmes 12

Annex B (informative) Further information on some methods of measurement and test 15
