

ISO 18283:2006-09 (E)

Hard coal and coke - Manual sampling

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Establishing a sampling scheme	5
4.1	General	5
4.2	Sampling methods	6
4.3	Design of the sampling scheme	6
4.4	Precision of sampling	9
4.5	Checking the overall precision for the lot by calculation and selection of sampling scheme	23
4.6	Determination of acquired precision by replicate sampling	23
4.7	Size analysis	24
5	Methods of sampling	25
5.1	General	25
5.2	Sampling by time interval	25
5.3	Sampling by mass interval	25
5.4	Stratified random sampling	26
5.5	Extracting the increment	26
5.6	Fuel in motion	27
5.7	Moisture/common sample	29
5.8	Different fuels	30
5.9	Random selection of increments	30
6	Sampling equipment	31
6.1	General	31
6.2	Examples	32
7	Handling and storage of samples	39
7.1	Sample size	39
7.2	Time	39
7.3	Divided sample	39
7.4	Containers	39
7.5	Moisture loss/breakage or degradation	40
7.6	Identification/labelling	41
8	Sample preparation	41
8.1	General	41
8.2	Constitution of a sample	41
8.3	Division	42
8.4	Reduction	52
8.5	Mixing	53
8.6	Air-drying	53
8.7	Coal -- Preparation of test samples	54
8.8	Coke -- Preparation of test samples	61

9	Packing and marking of samples and sampling report	64
	Annex A (informative) Example of calculation of precision, mass of increments, number of sub-lots and number of increments per sub-lot	66
	Annex B (informative) Methods of sampling large fuels and fuels from stationary lots	69
	Bibliography	71
