## Refrigerated light hydrocarbon fluids - Sampling of liquefied natural gas - Continuous and intermittent methods

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Outline of sampling system .....	3
4.1	General .....	3
4.2	Continuous sampling .....	3
4.3	Intermittent sampling .....	6
5	Precautions .....	7
5.1	Precautions to be taken in handling LNG .....	7
5.2	Partial evaporation of the LNG sample .....	7
5.3	Supervision during sampling .....	7
6	Apparatus .....	7
6.1	Materials used .....	7
6.2	Sample probe .....	7
6.3	LNG sample vaporizer .....	7
6.4	Compressor for transferring gasified LNG .....	8
6.5	Pressure regulator .....	8
6.6	Gas sample holder .....	8
6.7	Gas sample compressor .....	8
6.8	Gas sample container or CP/FP sample container .....	8
6.9	Piping arrangement .....	9
6.10	Sample filter .....	10
7	Sampling procedure .....	10
7.1	Sampling period .....	10
7.2	Consecutiveness of sampling .....	10
7.3	Suspension of sampling .....	11
7.4	Continuous sampling .....	11
7.5	Intermittent sampling .....	12
8	Test report .....	13
Annex A (informative)	Example of calculation of degree of sub-cooling .....	14
Annex B (informative)	Constant pressure (CP)/floating piston (FP) sample container with technical specifications .....	17
