|---------------------------------------------------------------------------------|-----------|
| Foreword.....                                                                   | v         |
| Introduction.....                                                               | vii       |
| <b>1 Scope.....</b>                                                             | <b>1</b>  |
| <b>2 Normative references.....</b>                                              | <b>1</b>  |
| <b>3 Terms and definitions.....</b>                                             | <b>2</b>  |
| <b>4 Symbols and abbreviated terms.....</b>                                     | <b>4</b>  |
| 4.1 Symbols.....                                                                | 4         |
| 4.2 Abbreviated terms.....                                                      | 4         |
| <b>5 General.....</b>                                                           | <b>5</b>  |
| 5.1 Competence assurance.....                                                   | 5         |
| 5.2 Compliance.....                                                             | 5         |
| <b>6 Cathodic protection system requirements.....</b>                           | <b>5</b>  |
| 6.1 General.....                                                                | 5         |
| 6.2 Selection of CP systems.....                                                | 6         |
| 6.2.1 General.....                                                              | 6         |
| 6.2.2 System selection considerations.....                                      | 6         |
| 6.3 Isolating joints.....                                                       | 7         |
| <b>7 Design parameters.....</b>                                                 | <b>7</b>  |
| 7.1 General.....                                                                | 7         |
| 7.2 Protection potentials.....                                                  | 9         |
| 7.2.1 Potential criteria.....                                                   | 9         |
| 7.2.2 HISC evaluation for martensitic and duplex stainless steel materials..... | 10        |
| 7.2.3 Thermally sprayed aluminium.....                                          | 11        |
| 7.3 Design life.....                                                            | 11        |
| 7.4 Design current densities for bare steel.....                                | 11        |
| 7.4.1 General.....                                                              | 11        |
| 7.4.2 Splash zone.....                                                          | 13        |
| 7.4.3 Buried pipelines.....                                                     | 13        |
| 7.4.4 Thermally Sprayed Aluminum Coated Pipelines.....                          | 13        |
| 7.4.5 Elevated temperatures.....                                                | 13        |
| 7.4.6 Current drains.....                                                       | 13        |
| 7.5 Coating breakdown factors.....                                              | 14        |
| <b>8 Galvanic anodes.....</b>                                                   | <b>16</b> |
| 8.1 Design of system.....                                                       | 16        |
| 8.2 Selection of anode material.....                                            | 17        |
| 8.3 Electrochemical properties.....                                             | 17        |
| 8.4 Anode shape and utilization factor.....                                     | 18        |
| 8.5 Mechanical and electrical considerations.....                               | 19        |
| <b>9 Galvanic anode manufacturing.....</b>                                      | <b>20</b> |
| 9.1 Pre-production test.....                                                    | 20        |
| 9.2 Coating.....                                                                | 20        |
| 9.3 Anode core materials.....                                                   | 20        |
| 9.4 Aluminium anode materials.....                                              | 21        |
| 9.5 Zinc anode materials.....                                                   | 21        |

|           |                                                                                |           |
|-----------|--------------------------------------------------------------------------------|-----------|
| <b>10</b> | <b>Galvanic anode quality control</b>                                          | <b>22</b> |
| 10.1      | General                                                                        | 22        |
| 10.2      | Steel anode cores                                                              | 22        |
| 10.3      | Chemical analysis of anode alloy                                               | 22        |
| 10.4      | Anode mass                                                                     | 22        |
| 10.5      | Anode dimensions and straightness                                              | 22        |
| 10.5.1    | Slender anodes                                                                 | 22        |
| 10.5.2    | Bracelet anodes                                                                | 22        |
| 10.6      | Anode core dimensions and position                                             | 23        |
| 10.7      | Anode surface irregularities                                                   | 23        |
| 10.7.1    | Slender anodes                                                                 | 23        |
| 10.7.2    | Bracelet anodes                                                                | 23        |
| 10.8      | Cracks                                                                         | 24        |
| 10.8.1    | General                                                                        | 24        |
| 10.8.2    | Aluminium slender anodes                                                       | 24        |
| 10.8.3    | Aluminium bracelet anodes                                                      | 24        |
| 10.9      | Internal defects, destructive testing                                          | 25        |
| 10.10     | Electrochemical quality control testing                                        | 25        |
| <b>11</b> | <b>Galvanic anode installation</b>                                             | <b>26</b> |
| <b>12</b> | <b>Impressed-current CP systems</b>                                            | <b>27</b> |
| 12.1      | Current sources and control                                                    | 27        |
| 12.2      | Impressed-current anode materials                                              | 27        |
| 12.3      | System design                                                                  | 28        |
