	Page
Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Abbreviated terms	7
5 Conformance	7
5.1 Rounding	7
5.2 Conformity to requirement	7
6 Definition for field joint material, system interfaces and repairs	8
6.1 Material classes	8
6.2 Types of interfaces	8
7 Project specific qualification processes for production and application procedures	9
7.1 General requirements	9
7.2 Purchase order requirements	9
7.2.1 General information	9
7.2.2 Additional information	10
7.3 Production qualification process	10
7.3.1 Process description	10
7.3.2 Project specific qualification considerations	11
7.3.3 Procedure qualification trial	11
7.3.4 Pre-production trial	12
7.3.5 Production testing	12
7.4 Application procedures	12
7.4.1 Application procedure specification	12
7.4.2 Inspection and testing plan	14
7.4.3 Qualification of operators	14
8 Production testing and inspection	16
8.1 General	16
8.2 Material tests and inspection	16
8.3 System test and inspection	16
8.4 Inspection documents and traceability	16
8.5 Guidance in generating an ITP	16
9 Requirements for field repairs	31
9.1 General	31
9.2 Damage/defect characterization	31
9.3 Repair materials for each of the material classes and compatibility	31
9.4 Repair execution	31
10 Final documentation	31
11 Handling, storage and transportation at site	32
12 Pre-fabricated insulation	32
12.1 General	32
12.2 Material classes	32

12.3	Project specific qualification processes.....	33
12.4	Information to be supplied by the system purchaser.....	33
12.5	Manufacturing of pre-fabricated insulation	34
12.6	Inspection and testing plan.....	34
12.7	Installation of pre-fabricated insulation.....	44
Annex A	(informative) Guidelines for using this document.....	45
Annex B	(informative) Guidelines on the design of field joint systems on a project basis	49
Annex C	(informative) Field joint adhesion testing.....	52
Annex D	(informative) Guidelines for pre-fabricated insulation.....	55
Bibliography	59
